

Environmental Policy

We believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impacts and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to :-

- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Reduce our waste and re-use or recycle as much of it as possible.
- Reduce energy usage in our building and processes in order to conserve supplies, and reduce our consumption of natural resources, especially where they are non-renewable.
- Apply the principles of continuous improvement in respect of air, ground and water pollution from our premises and reduce any impacts from our operations on the local and wider environment.
- Ensure that all employees understand our environmental policy and conform to the standards it requires.
- Address complaints about any breach of our Environmental Policy promptly and to the satisfaction of all concerned.
- Update our Environmental Policy annually in consultation with staff, associates and customers.
- Have the EMS externally audited and certified to ISO 14001:2004 on an annual basis.
